- ✓ Full complement of B Group Vitamins.
- ✓ High specification of antioxidants & performance nutrients.
- ✓ Provides essential amino acids.
- ✓ Added Yeasacc 1026 for gut health.

MADE IN  
OUR OWN  
UK MILL

### Product Description

Designed to help improve the performance of the hard working equine athlete, Rowen Barbary Power contains a specifically formulated blend of micro nutrients to enable your horse to perform at its best.

With a full complement of B group vitamins Rowen Barbary Power is particularly beneficial to the performance horse and horses with poor appetites, but it will also help to reinvigorate any horses feeling run down. B vitamins play a vital part in the metabolism of a horse's energy and are naturally produced as a result of fibre digestion in the hind gut, therefore any horses fed on a low fibre diet will benefit from being fed Rowen Barbary Power.

Increasing athletic work can cause free radical production to flourish, so Rowen Barbary Power contains a high specification of antioxidants alongside performance nutrients to help attract and bind free radicals. This will help improve stamina in the performance horse as well as helping to reduce exercise induced muscle damage strengthening the immune response helping the horse to remain healthier in times of stress.

Rowen Barbary Power also contains essential amino acids which are the building blocks of protein.

To help support a healthy digestive system Yeasacc 1026 is also included which will help support optimum fibre and mineral digestion within the hind gut and help to maintain gut health in the performance horse.

### Analytical Constituents

Oil	6.00 %	Nicotinic Acid	2000 mg/Kg
Protein	17.00 %	Pantothenic Acid	1,000 mg/Kg
Fibre	9.00 %	Choline	15,000 mg/Kg
Vitamin A	1,000,000 iu/Kg	Iron	4,000 mg/Kg
Vitamin D3	200,000 iu/Kg	Manganese	4,000 mg/Kg
Vitamin E	50,000 iu/Kg	Copper	1,000 mg/Kg
Vitamin K	200 mg/Kg	Zinc	4,000 mg/Kg
Vitamin B1	1,000 mg/Kg	Iodine	250 mg/Kg
Vitamin B2	1,000 mg/Kg	Selenium	30 mg/Kg
Vitamin B6	600 mg/Kg	Lysine	50 g/Kg
Vitamin B12	50 mg/Kg	Methionine	50 g/Kg
Folic Acid	2,000 mg/Kg	Yeast 1026	100 g/Kg
Biotin	40 mg/Kg		

### Feeding Guidelines:

10gm per 100kg bodyweight daily, split between feeds.

10ml heaped scoop: 10g
