## MYCOSORB A +

### Key Points:

- ✓ Mycotoxin binder
- ✓ Immune system support
- ✓ Digestive health

PACKED IN  
OUR OWN  
UK MILL

### Product Description

There are many different known mycotoxins which can affect health, by feeding Mycosorb A+® this will help reduce mycotoxin absorption and contribute to the control of mycotoxins.

Mycosorb is a patented yeast cell wall extract that offers superior binding capabilities, a broader adsorption profile and increased efficacy.

Mycosorb A+:

- Contributes to managing the impact of mycotoxins.
- Supports immune function.
- Contributes to the control of mycotoxins.
- Reduces mycotoxin absorption within the animal and reduces risk factors associated with the damaging effects of mycotoxins on its health.

Mycosorb A + is not absorbed into the system and so does not require other ingredients to help it perform.

### Feeding Guidelines

With a low effective inclusion rate Mycosorb can be fed in the diet daily, or as and when required.

Maintenance Rate - 2g per 100kg bodyweight per day

Higher Rate - 4g per 100kg bodyweight per day

For best results split into 2 feeds.

### Physical Properties

Colour: Light tan coloured, free flowing powder
